

■ POLYMER ADDITIVES

JADEWIN 1500

ANTIOXIDANT

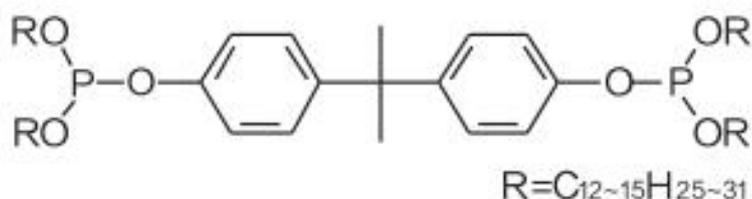

CHEMICAL COMPONENT

COMPONENT 4,4'-Isopropylidenediphenol C12-15 Alcohol Phosphite

CAS 96152-48-6

FORMULA N/A

M.W. ≈ 1112

SPECIFICATION AND PHYSICAL PROPERTIES

TEST	UNIT	SPECIFICATION
APPEARANCE		COLORLESS LIQUID
REFRACTIVE INDEX		1.4860-1.4980
SPECIFIC GRAVITY		0.950-0.980

FEATURE AND APPLICATION

- JADEWIN 1500 is high molecule phosphite ester Antioxidants, with very high phosphorus
- JADEWIN 1500 has stronger ability to decompose hydroperoxide (ROOH) than common phosphite Antioxidants.
- JADEWIN 1500 is widely used as secondary antioxidant in many polymers including PVC Polyurethane (PU) and etc, it can be used with hinder phenolic antioxidant and UV Absorbers to have Synergist effect.

Application

- PVC Film
- Polyurethane Film and glue
- Rubber and Latex
- Rosin and unsaturated resins

**QINGDAO JADE NEW MATERIAL
TECHNOLOGYCO.,LTD**
青岛杰得佳新材料科技有限公司

-PUR Coatings

PACKING

200 KG Drum

STORAGE

Keep container tightly closed and dry and storage in cool place
