

POLYMER ADDITIVES

JADEWIN 50% 8160 Emulsion

Antioxidant

CHEMICAL COMPONENT

SPECIFICATION AND PHYSICAL PROPERTIES

TEST	UNIT	SPECIFICATION
APPEARANCE		WHITE LIQUID
ACTIVE INGREDIENTS	%	50.0
SOLID CONTENT	%	51.0 - 54.0
VISCOSITY	CPS	10 - 500
SPECIFIC GRAVITY	G/CM3	1.00-1.10
PH	MM	9.5-11.5
PARTICLE SIZE	%	≤3.0

FEATURE AND APPLICATION

● JADEWIN 50% 8160 Emulsion contains phenolic antioxidants as active ingredients: butylated products of p-cresol and dicyclopentadiene (Wingstay L)

● Features

1. High activity and extremely low volatility provide excellent high-temperature processing performance and long-term protection
2. Active ingredients are non-staining, non-reddening antioxidants
3. Additives and emulsification system are rigorously selected to meet FDA and BgVV requirements
4. Exceptional cost-performance ratio
5. Originally developed for ABS, but recently proven and successfully applied to other polymer latexes (e.g., SBR latex)

PACKING

250 Kg High-Density Polyethylene Drums, 1000 Kg Intermediate Bulk Containers, Or Bulk Tank Trucks

STORAGE

Keep container tightly closed and dry and storage in cool place
